FIRST AID

SWALLOWED Wash mouth and lips with water. Do not induce vomiting. Give water or milk to dilute stomach contents. Seek medical attention if symptoms persist.

EYES Irrigate with copious quantities of clean water or saline solution for at least 15 minutes. Seek medical attention if discomfort persists. Continue irrigating the eyes with clean water or saline solution while transporting to medical facility.

SKIN Remove dusty clothing. Wash skin with tepid soapy water. Shower if required. Apply skin moisturiser.

INHALED Move immediately to fresh air. Seek medical attention if symptoms persist.

FIRST AID FACILITIES

Eye wash station.

ADVICE TO DOCTOR

Treat symptomatically. Contact a poisons information centre.

MANUFACTURER'S RECOMMENDATIONS

Minimise exposure to dust and avoid repeated skin contact.

Always wear suitable protective clothing and use respiratory equipment.

Use impervious elbow length gloves, impervious boots and full length clothing to protect the skin from contact with dust.

After working with this product, workers are advised to shower with soap and water and apply skin moisturiser. Work clothes should be washed regularly.

Safety spectacles with side shields or safety goggles (dust resistant AS/NZ 1336) should be worn if dust is likely to be generated.
